

Worksheet for School Students

1. Which animal at the Reserve is your favourite? Why?

2. Name a Native animal at the Reserve. What does "Native" mean?

3. Predators kill and eat other animals (their prey). Give an example of a predator/prey relationship at Staglands (ie. Name the predator and state what it preys upon)

4. What do birds need to be protected from?

5. What is Staglands doing to protect birds?

6. Auckland Island Pigs are a rare species. What does this mean?

7. Look carefully at the Kaka and the Kea. They are both New Zealand parrots. What similarities do they share?

8. Name 3 Staglands animals that are classed as “mammals”. What is a “mammal”? Are people mammals?

9. What does “endangered” mean? What happens to an animal to make it “endangered”?

10. What is a species?

11. What are talons? Where on the body of a bird are they?

12. Staglands is 10 hectares. This is the same as 25 acres. How many acres are there in 20 hectares?

13. Name an endemic bird. What is the difference between endemic and Native?
